The **Shift To Immersive Storytelling**

The traditional toolkit of lookbooks and static banners is failing to engage.

Leading brands are shifting from **show to story**, moving beyond product-led ads to experience-led journeys.

The new edge lies in **making fashion storytelling highly contextual** to cultivate meaningful relationships with the audience.

Personalisation Gap in Fashion Ads

→ **74%** feel frustrated by non-personalised ads

→ **62%** lose loyalty over irrelevant messaging

→ **76%** crave personalisation, but only **32%** of marketers deliver

Closing the gap requires intent, using data to craft stories that resonate and feel personal.

Fashion Ads That **Spark Action**

In today's attention economy, fashion ads must pair storytelling with personalisation, ensuring the right story reaches the right audience at the right moment.

With Dynamic Creative Optimisation and QR-powered shopping, fashion ads move beyond relevance, creating emotional impact tailored to time, place, and culture

Dynamic Creative Optimization

QR Led Shoppable Ads

Hyper-local relevance: Ads auto-adapt to region, culture, and time of day for higher resonance.

Festive-to-commerce journey: Campaigns flow seamlessly from storytelling to “shop-the-look” conversions.

Scan-to-act engagement: QR codes transform attention into instant actions like purchase, signup, or download.

According to a VDO.AI report, fashion ads on **CTV achieve ~97% completion rates**, with **67% of top campaigns powered by Dynamic Creative Optimization**.

Fashion Ads, **Reimagined**

Fashion's new runway is digital, where immersive storytelling turns ads into curated experiences that are remembered, not scrolled past.
